## COASTAL DATA BUOY SYSTEM

### SOUNDNINE DANTE

- Buoy controller and real-time telemetry device
- The ability to integrate a large suite of instruments
- Supports virtually any oceanographic or environmental sensor in use today
- Iridium or GSM options available
- User friendly
- Self-contained, with the ability to solar power itself and the integrated sensors
- Robust and waterproof; no additional buoy housing required

### SUPERSTRUCTURE

- Strong and light alloy construction
- Lifting point for hassle free deployment and recovery
- Provisions for navigation light, radar reflector and top-mark

### CLOSED CELL FOAM FLOAT

- Strong and light for impact resistance and long life.
- Virtually unsinkable

### SUBSTRUCTURE

- Steel construction for maximum strength in all weather events
- Protective instrument bay for near-surface sensors
- Mooring point for custom mooring design
- Mooring design and supply also available at Imbros
